2021 DATA CAPABILITY MATURITY ASSESSMENT

Is Your Company Gaining Momentum in Data?

The DACAMA survey at a glance

- This is the third DACAMA survey; previous surveys were conducted in 2015 and 2018
- Approximately 1,100 companies participated worldwide
- Companies rated their performance across seven core data capabilities that collectively cover more than 40 competencies
- · We weighted the competencies and created an index from 100 to 500 to place companies at a data maturity stage: lagging (100), developing (200), mainstream (300), state of the art (400), or best practice (500)
- · Critically, the survey asked companies about their current performance and their aspiration for three years in the future
